# Delivering More

At Select Sires, we are committed to “Delivering More” to you, our customer-owners. Throughout the following pages, we share with you how we deliver *more* fertility, *more* cutting-edge genetics, *more* expertise and service, *more* market access, and ultimately *more* profitability for you, your family and your operation.

Relationships matter. We genuinely believe that relationship building is the foundation upon which significant results can be achieved and together we can achieve more than any one entity can alone. As a cooperative, our priorities will always be to invest in and strengthen our relationships with our customer-owners, seedstock partners, employees, and supply chain team members. We’ve found that supply chains that create and capture value are strengthened by relationships built on integrity and trust and we believe these strong relationships are vital to achieving our bold vision of cooperation, shared success and sustainability.

At Select Sires, we are excited about the growing opportunities for high quality, great tasting beef. We are inspired to further our relationship with you in pursuing our ultimate goal of improving your profitability through the combination of the best genetics in the world and the best people in the industry.

*Gratefully,

Select Sires has a rich tradition of delivering more and the list of sires you rely on is long. Our cover displays just six of the sires that have truly delivered —three representing where we’ve been and three representing where we’re going; 7AN194 RITO 616, 7AN222 PREDESTINED and 7AN368 COMRADE, along with 7AN580 HOME TOWN, 7AN525 GROWTH FUND and 7AN466 RAINFALL. We’re proud to bring you genetics from many of the best sires in the world as just part of our effort to deliver more to you, our customer-owners.

# SELECT SIRES *DELIVERS MORE* A.I. PREGNANCIES FOR YOU!

*We Deliver More.*

ASK US HOW WE CAN MAKE YOUR JOB EASIER AND MORE PROFITABLE.

# SELECT SIRES DESIGNATIONS

New in this year's directory, you will find icons designating traits and/or industry sectors where a sire offers significant improvement. Listed below are the descriptions for these new icons. Use these icons to help find and utilize the sires that best fit your needs and goals.

## COWMAKER

The Cowmaker logo designates sires expected to make the next generation of daughters to retain in your herd. This designation is a combination of maternal EPDs and reports from the field.

## FERTILITY VERIFIED

Using conception data along with quality control evaluations, beef sires designated as Fertility Verified have been field tested and achieved Select Sires' industry-leading quality standards.

## PROOF POSITIVE

Sires that are .85 or higher accuracy for Birth Weight EPD.

## CALVING EASE

These sires are your go-to for your heifers. The Calving Ease logo identifies sires that rank high for Calving Ease Direct and/or have been successfully used in the field on virgin heifers.

## CARCASS

The Carcass logo designates sires that will add carcass value and quality. These sires rank high for marbling, ribeye area and \$B.

## CAB TARGETING THE BRAND

Identifies sires that will help you target CAB standards.

**Limitations and Conditions of Sale:** *gender* SELECTED semen shall be used only for the single insemination of one female bovine during natural ovulation with the intent to produce a single offspring unless specifically approved on an individual customer basis by Sexing Technologies in writing. As a condition of purchasing *gender* SELECTED semen, the purchaser agrees that *gender* SELECTED semen will not be reverse sorted or re-sorted unless specifically permitted, in advance, on a case-by-case basis by Select Sires in writing. Select Sires intends to monitor the use of the *gender* SELECTED semen and vigorously enforce these restrictions on use. Please see <http://www.selectsires.com/designations/gendersselected.html> for additional details.

## SHOWCASE

Sires earn the Showcase™ designation through outstanding show results or from a show-winning pedigree. Turn to this designation to produce your next show winner or to improve the overall phenotype of your herd.

## PERFORMANCE LEADERS

Expect Performance Leaders sires to deliver cattle that are leaders for adding growth. These sires will rank among the best in their respective breeds for WW, YW, and ADG.

## PAP

These sires are designed to perform at high altitudes and rank high for PAP EPD or by having great individual PAP data.

## *gender* SELECTED<sup>SexedULTRA</sup>

This icon identifies sires with sex-sorted female semen available. All *gender* SELECTED semen is processed using SexedULTRA technology.

## *gender* SELECTED<sup>4M</sup><sub>SexedULTRA</sub>

Look for the *gender* SELECTED 4M icon to identify sires with sex-sorted female semen available in 4 million sperm doses. All *gender* SELECTED semen is processed using SexedULTRA technology.

## *gender* SELECTED<sup>4M</sup><sub>SexedULTRA</sub>

This icon identifies sires with sex-sorted male semen available. All *gender* SELECTED semen is processed using SexedULTRA technology.

## 44 BUY BACK PROGRAM

This represents a sire with progeny qualifying for the 44 Farms Prime Pursuits and Angus Strong buy back programs. Using these sires will make your calf crop eligible to participate in 44 supply chain opportunities.

™Showcase, *gender* SELECTED, *gender* SELECTED 4M and Proof Positive are trademarks of Select Sires Inc. SexedULTRA and SexedULTRA 4M are trademarks of Inguran LLC. ©Certified Angus Beef and CAB are registered trademarks of Certified Angus Beef LLC.

GAR 111 RITO 3346

- ◇ OPTIMUM was named for his ability to combine phenotype with the right amount of growth and performance in a functional frame size with a numeric data set offering Calving Ease, superb growth, breed-leading Marbling and superior \$ Indexes.
- ◇ His dam, GAR Progress 830, has established herself as one of the breeds most impactful donors for propagating extreme marbling as she holds an ultrasound progeny record with 58@113 for IMF and 57@102 for UREA. She has 26 daughters in production with 39 progeny combining for a average weaning ratio of 102.
- ◇ The first calves by OPTIMUM are on the ground and standouts for phenotype in the pasture! The early information suggests OPTIMUM will be a true calving ease sire without sacrificing growth and eye appeal.
- ◇ This sire is stacked with breed-leading genetics that are poised to move the next generation forward.

- ◇ GROWTH FUND provides dependable, highly proven genetics that have risen to the top of many of the best herds in the country. His progeny are easy to find in the pasture and on paper.
- ◇ Study the details of his remarkable EPD profile. He hits the marks with progeny proof to back it up!
- ◇ Offers consistent quality in terms of phenotype and genetic merit from most any pedigree combination. This bull does it all very well.
- ◇ His progeny have topped both bull and female sales across the country with built-in profit for both seller and buyer.
- ◇ His first daughters are in production and are stand-out two-year-olds wherever you see them. They possess beautiful udder quality with small teats and level udders with excellent teat placement.
- ◇ Easy to use, easy to like, easy to sell. Increase your assets — invest in GROWTH FUND.

# 7AN700 G A R **HOMETOWN HERO**

**\$30**

**NEW**

One of HOME TOWN's most powerful sons to date. Physically magnificent with exceptional

feet combined with an agility appreciated by all. It is exciting to our family that this bull's pedigree stacks 14 Select Sires bulls, all the way back to Schearbrook Shoshone. This is significant in the fact that the discipline of selection to create these genetics goes back 50 years if you look at Shoshone's birthdate in 1971. HOMETOWN HERO's elite presence combined with growth, marbling and functionality gives him the opportunity to enhance our industry with genetics that excel today. No surprise when we look at the exceptional sires of note in his ancestry that have led our industry to the beef demand that we all enjoy today!

Mark Gardiner

- ◊ Sired by the red-hot sales leader, 7AN580 HOME TOWN, HOMETOWN HERO could easily be his most unique son.
- ◊ HOMETOWN HERO is an absolute phenotypic standout that is a man among boys. He is powerful from end to end with tons of base width and capacity.
- ◊ Power sire with good feet, solid foot EPDs and lots of MARB. Those are traits not usually talked about in the same sentence and this is why we are so excited!
- ◊ Famous pedigree that combines Select Sires greats of HOME TOWN, 7AN392 MOMENTUM, 7AN320 PROPHET and 7AN255 5050.
- ◊ Semen available Spring 2022.

- ◇ HOME TOWN continues to write a great story and offers a value proposition like few sires can.
- ◇ Rationing 107 for IMF against tough competition, he offers phenomenal genetics to generate high-quality, high-value end-product.
- ◇ Moderate for size, you'll be impressed with the muscle shape and good looks you get in HOME TOWN calves.
- ◇ One of the top bulls in the breed for registrations, look for him to be there again next year. The Angus sale season featured HOME TOWN offspring at the high end of many sale reports – and this trend will continue.

- ◇ TAHOE is one of the most complete sires in the Angus breed. He is a proven, multi-purpose sire that will take you in the right direction for a wide variety of traits.
- ◇ Few sires can match his combination of Calving Ease, Performance, Maternal Traits, and Carcass Merit while improving phenotype and longevity.
- ◇ TAHOE has been utilized both in seedstock and commercial programs yielding great results by producing consistent progeny for the pasture and the sale ring, including several sale toppers across the country.
- ◇ Ranks near the top of the breed for Maternal value. He makes beautiful daughters that are easy-fleshing, deep-ribbed, with excellent udder quality and teat length.
- ◇ Ranking very high for hair shedding, TAHOE covers the bases for many regions and climates.
- ◇ A high accuracy sire that has exceeded all expectations, bred by a program that has been focused on maternal output coupled with end-product value.

- ◇ New to Select Sires for 2022. IRON HORSE has been on our radar for some time and we are excited to add him to our lineup as a proven sire.
- ◇ Study his EPD profile closely. IRON HORSE is a high ranking \$C sire that also brings exceptional growth and carcass. However, his most unique traits are his high-ranking foot EPDs. High \$C with great foot EPDs are very rare!
- ◇ The support photos don't lie...IRON HORSE complements his EPD profile with great phenotype.
- ◇ Lots of mating flexibility being an outcross for most. EXAR Stallion x BUTKUS.
- ◇ Semen available Spring 2022.

- ◇ WALL STREET is a true beef sire with tremendous depth of body and thickness from head to tail. He's a masculine sire that captures your attention from every angle.
- ◇ High ranking for HP, Marbling, foot quality and growth, WALL STREET hits the high marks on the \$Indexes.
- ◇ This sire provides a rare combination of traits that are coupled with the ability to sire exceptional phenotype. One of his daughters was named the Grand Champion PGS female at the 2021 National Junior Angus Show.
- ◇ Wide, deep and super-sound, WALL STREET is easily one of the most physically impressive sires in our lineup.

- ◇ Maternal strength at its best!
- ◇ Ranks at the top of the breed for \$Maternal and his daughters support it. Consistently sires deep-ribbed, easy-fleshing females that are moderate-framed with ideal udder structure and quiet dispositions.
- ◇ A low birth weight cowmaker that sires high volume cattle with extra width of base and dimension, flawless structure, and an unmistakable profile and presence.
- ◇ One of our best for improving feet as validated by his Claw and Angle EPDs.
- ◇ If you desire high-quality, problem-free cattle that get the job done with minimal expense, RAINFALL delivers consistently.

- ◇ MARVEL stacks the most elite show heifer genetics ever produced at PVF.
- ◇ He combines the popular Blacklist with the most powerful donor female to ever come out of the Missie cow family.
- ◇ His first progeny to sell were PVF sale toppers and we will see more of them in the 2022 show season.
- ◇ MARVEL is flawless in design. He has tremendous rib shape, extra depth of body, a long, powerful hip and is as sound and free moving as you can make one.
- ◇ MARVEL combines a pedigree that will provide all the ingredients to make him an impact sire for those searching for high phenotype cattle that can compete at any level.

- ◇ REGIMENT breaks the barriers for BW to YW spread. His calves are born easily and are quick to grow, many from his first calf crop are leaders across the country and have demanded top sale prices.
- ◇ He blends a highly sought-after pedigree with incredible growth and carcass predictions.
- ◇ REGIMENT was the lead member of a tremendous flush with his full siblings commanding top prices at the Wilks Sale.
- ◇ He is built from the Chloe cow family that has consistently produced breed-leading genetics in both the Basin and Vintage programs.
- ◇ His \$Indexes are impressive being in the elite top 1 percent of the breed for \$F, \$W, \$B and \$C.
- ◇ REGIMENT has been in high demand and we are just getting started. His unique blend of pedigree, performance and phenotype ranks him among the breed's very best.

- ◊ A proven Calving Ease sire that creates premium feeder cattle with exceptional growth, performance and industry leading end-product value.
- ◊ Backed by a phenomenal cow family, he sires ultra-attractive, long-bodied, deep-ribbed, heavy-muscled progeny that are phenotypical standouts.
- ◊ With modest milk and extra fleshing ability, he's an ideal choice for low input environments.

THERE IS STRENGTH *in* NUMBERS.  
AND OUR NUMBERS ARE STRONG.

The highest priority of our Angus Strong® genetics program is the success and profitability of our customers. It starts with an emphasis on the traits that our customers find to have the greatest economic impact on their herds and balanced EPD profiles.

In this age of new technology and avenues to market cattle, they are still sold by the pound. Nearly every producer markets their calves at weaning time or they will background their cattle and then sell them as yearlings. The sires used in our embryo and AI programs are many of the finest in the Angus breed for these important growth traits.

Some producers choose to retain ownership of their calves and market them at endpoint. Our genetics are strategically bred with this marketing option in mind. Marbling is a hallmark of 44 Farms genetics. With the potential of these calves being in our Prime Pursuits® program with Walmart®, producing an all-natural

USDA Prime or Choice product is a necessity. The bulls produced at 44 Farms are some of the best marbling bulls in the breed - producing high-marbling calves in a wide variety of cows and environments.

Improved performance, carcass quality and all-important convenience traits drive profitability for our customers. They invest with confidence knowing that with every breeding decision we make, the commercial producer's wants and needs are being met.

**LET US HELP YOU IMPROVE THE  
PREDICTABILITY, PERFORMANCE  
AND PROFITABILITY OF YOUR HERD.**

# 7AN683 HF **SAFE & SOUND** 019

**\$25**

- ◊ A must-use young sire, SAFE & SOUND offers a unique maternal pedigree that hits the mark for every aspect of the beef business.
- ◊ This moderate-statured son of 7AN433 IDENTIFIED is destined to be a Calving Ease and Cowmaker sire that still adds end-product merit.
- ◊ Ranks in the top 1 percent of the breed for both \$Maternal and \$Weaning, while ranking in the top 10 percent of the breed for \$Combined.
- ◊ Phenotypically complete, SAFE & SOUND, is big-middled, heavy-muscled, with great feet and a herd sire presence.

SIRE: **BALDRIDGE ALTERNATIVE E125**  
BALDRIDGE BLACKBIRD A030

DAM: **BALDRIDGE ISABEL B061**  
BALDRIDGE ISABEL Y69

- ◇ On the cutting edge of Angus genetics, MOVIN ON is built from royalty.
- ◇ He's an elite calving ease prospect with all the perks for fertility, maternal traits, growth and end-product merit.
- ◇ MOVIN ON is ideal in his structure and type with exceptional foot quality. He has a long, square hip with a strong rear leg, extra depth of body and width throughout.
- ◇ Built from the two most prominent cows in the Baldridge program, Y69 and A030.
- ◇ His first calves have arrived with ease and have hit the ground running.
- ◇ If calving ease and growth get your attention, then add MOVIN ON's type and pedigree to the equation and he makes the short list in a hurry.

From Baldridge Bros., NE; Boyd Beef Cattle and Blake Boyd, KY and Trowbridge Angus, NY

“MOVIN ON is a high phenotype bull with built in maternal power. He is very long-spined, has added muscle shape and tons of character. He addresses a lot of needs in terms of his foot quality and quiet disposition. Based on our first calves, they were born small, with excellent vigor. He will be our go-to bull for calving ease that still offers the right necessities.”

Charlie Boyd  
Boyd Beef Cattle, KY

# 7AN697 YON **COUNTY ROAD** H1389

\$22

- ◊ One of the most unique Angus sires to enter A.I. this year.
- ◊ COUNTY ROAD is a Calving Ease and Cowmaker deluxe from one of the most respected maternal herds in the country.
- ◊ His pedigree is written for maternal strength and is validated with a high \$Maternal index and high Heifer Pregnancy!
- ◊ This sire will catch one's eye on paper but it gets even better in the pasture. COUNTY ROAD is a very deep-sided sire that tracks wide and has exceptional foot quality with a long, level hip, a strong topline and his shoulder blends well into his body.
- ◊ Check out his rare combination of \$M and \$C, it doesn't get much better!
- ◊ If you're breeding heifers, making cows or just trying to cover all the bases, take a "COUNTY ROAD" tour, you will end up at the right place.
- ◊ Semen available Spring 2022.

# 7AN473 CONNEALY **LEGENDARY** 644L

**\$22**

- ◇ His popularity continues because of his reliable Calving Ease, excellent calf vigor, early rapid performance, and high fertility.
- ◇ He combines breed leading growth with moderate mature size, added muscle and structure as well as any proven sire in the breed.
- ◇ A carcass merit rock star ranking near the top of breed for Marbling, REA, \$B, and \$C. He has over 800 progeny with ultrasound records ratioing 110 for IMF and 102 for REA.
- ◇ He makes very productive daughters with excellent udder quality and ranks high for HP.
- ◇ An excellent choice for heifer projects, as he is consistently one of our high fertility sires in timed A.I. projects. Objective breeding records has earned him our Fertility Verified status.

**DAM:** MOLITOR999 BARBELLA 940-3012  
MOLITOR FA BARBELLA 389-940

- ◇ Blaze a new trail with one of the exciting and highest \$Combined sires in our lineup.
- ◇ In addition to Weaning and Yearling performance, he is a breed leader for the functional traits of Heifer Pregnancy, Docility, and Marbling and his progeny ratio 112 for IMF.
- ◇ He combines a no holes EPD profile with added frame size, extra length of body, muscle shape, and great Docility.
- ◇ Progeny are thick topped and attractive patterned with excellent shape, balance, and design.
- ◇ Very few sires can match his carcass merit and maternal value combination without sacrificing performance and phenotype.
- ◇ An excellent choice where a touch more frame and growth is preferred. He does this with modest Calving Ease, added Carcass Merit, and excellent Maternal Value.

# 7AN589 MYERS **SILVERADO** M109

**\$25**

- ◇ Moderately sized, thick, with a very attractive phenotype. SILVERADO is loaded with maternal strength from elite cows throughout his pedigree.
- ◇ A 14AN502 TAHOE son with added muscle shape in an eye-appealing package. An excellent mating choice to moderate frame, improve feet and legs, and add body substance.
- ◇ Elite Maternal Value - One of the best in our line-up for the functional traits of \$M, Heifer Pregnancy, Claw, and Angle.
- ◇ If you want Calving Ease without giving up substance and muscle shape, SILVERADO will do it in a sound eye-pleasing package.
- ◇ Leading edge \$Combination genetics with an emphasis on \$Maternal and complete phenotype.
- ◇ Sure bets are always in demand – that's why SILVERADO's pedigree of TAHOE, 7AN388 NIAGARA, and 7AN320 PROPHET offer confidence to many breeders.

# 7AN607 HOFFMAN **STAGECOACH** 1908

\$25

- ◊ A truly unique sire with an elite combination of phenotype, performance, and maternal strength.
- ◊ STAGECOACH ranks near the top of the breed for Heifer Pregnancy (HP), \$M, \$W, and \$C, and does this with breed leading growth and performance.
- ◊ His first progeny are very attractive and ratioing 99 for BW and 107 for YW.
- ◊ His pedigree combines two of our best in 14AN502 TAHOE and 7AN351 CAPITALIST.

# 7AN464 DEER VALLEY **UNIQUE** 5635

\$22

- ◊ Appropriately named for his ability to consistently produce easy keeping, deep bodied, sound structured cattle that perform well and make trouble-free daughters.
- ◊ He is truly one-of-a-kind in terms of structure, sheer mass, dimension, and depth of body.
- ◊ UNIQUE moves you forward for economically relevant traits while improving phenotypic function and longevity.
- ◊ A female-generating sire who is rich in pedigree with two breed legends - 7AN349 WEIGH UP and 643T.

# 7AN368 CONNEALY **COMRADE** 1385

\$20

- ◇ COMRADE will turn 11 this year, and continues to add to his record as the all-time high selling beef sire at Select Sires.
- ◇ This Calving Ease king delivers consistent, attractive calves who excel for Docility and moderate frame size.
- ◇ With nearly 7,000 Angus BW records, COMRADE continues to rank in the top 1 percent of breed for CED and BW.
- ◇ His daughters make easy fleshing, useful cows with an attractive pattern and super udders.
- ◇ An excellent choice for commercial heifer A.I. projects where a proven Calving Ease sire is a must.

# 14AN497 E&B **NEW ADDITION** 608

Accelerated Genetics™

**\$20**

- ◇ NEW ADDITION is a proven Calving Ease sire with good end-product merit and muscling while still offering a very maternal package with high marks for Docility, Heifer Pregnancy, and \$M.
- ◇ In addition to CE, he is a true maternal gem that ranks near the top of breed for \$M. His dam is a super uddered, excellent footed Dash daughter that is a donor at Benoit Angus. His granddam is an elite pathfinder Right Answer daughter.
- ◇ His daughters set him apart from the crowd. They are easy fleshing, deep ribbed, with excellent udder quality and good feet.
- ◇ He sires complete, attractive, and sound made cattle with added capacity, and excellent docility.
- ◇ An excellent choice for commercial heifer projects, where proven Calving Ease, Fertility, and Maternal Value are a must.

# 7AN600 SAT **WOLVERINE** 916

SELECT SHED

**\$20**

- ◇ Double digit Calving Ease son of 14AN502 TAHOE out of an outstanding three-year-old dam.
- ◇ Moderate for size with a massive rib design, incredible soundness, and above average muscle shape.
- ◇ WOLVERINE will add volume and fleshing ability without sacrificing growth.
- ◇ An excellent choice for combining a positive \$EN with elite Maternal Value and excellent Phenotype.

From Talkington Angus, ND

“WOLVERINE was the standout of his calf crop. He possesses the rare combination of calving ease potential and added muscle. He is exceptional in his skeletal structure and hoof quality. His dam may be the most exciting part about WOLVERINE. She owns an outcross pedigree, is easy fleshing, and excellent footed. She has bred 1st service AI all 4 years she's had a chance. Her birth ratio is 3@96, weaning ratio of 3@105, and yearling ratio of 2@110. WOLVERINE was a heavily used calving ease bull in the region this past spring and early reports on calving ease are promising.

# 7AN560 G A R **QUANTUM**

**\$25**

- ◇ Use QUANTUM to not only take advantage of exceptional carcass merit, but also to create big bodied, high performing, eye-appealing calves.
- ◇ He is a breed leader for both docility and foot scores.
- ◇ His sons and daughters have topped sales across the country because of their combination of powerful phenotype and exceptional EPDs.
- ◇ His sire stack of 7AN392 MOMENTUM, 7AN322 PROGRESS, and 7AN222 PREDESTINED is potent and proven.
- ◇ A proven calving ease sire creating high value sons and daughters.

## The Method Matters

The Method Genetics index values are derived from Method Genetics EPDs combined with industry-focused economic weightings. The Method EPDs are generated from a multi-trait, 'single-step' genetic evaluation that uses per-

formance measures, ancestral pedigree, and available DNA genotypes. This single-step approach incorporates the genotypes directly into the genetic evaluation process and was implemented at Method in the summer of 2014.

### Method Genetics™ Selection Index Key Used in the catalog

#### MATERNAL PRODUCTION INDEX (MPI):

The Maternal Production Index is reported in dollars per calf produced from the breeding herd with Angus-based genetics. It encompasses direct and maternal calving ease, heifer pregnancy, weaning growth, maternal milk, and mature size differences in a scenario where replacement females are retained and calves are marketed at weaning.

#### QUALITY POUNDS INDEX (QPI):

The Quality Pounds Index is reported in dollars per calf for herds with Angus-based genetics. It focuses on the terminal side of the herd's business for feedlot gain and carcass merit genetic differences. There are no provisions for calving ease or maternal traits, with the assumption that all calves are under a retained ownership scenario fed out and marketed on a premium quality-based grid.

Method Genetics  
Index / Percentile

MPI / %
167 / 1
QPI / %
166 / 1
ROI / %
300 / 1

#### METHOD GENETICS INDEX PERCENTILE RANKS (%):

A numeric ranking of the animal's Index values on a 1% to 100% scale. A lower numeric value is considered more favorable. For example, a 25% presented with an index indicates that animal is in the upper 25 percent of the animals in the Method Genetics genetic evaluation for calves born in the last five years.

#### RETAINED OWNERSHIP INCOME (ROI):

Cattle producers interested in a complete production system approach from conception through carcass end-point can use the Retained Ownership Income index. ROI ties together reproduction, calving ease, maternal genetic merit, growth throughout the calf's lifetime, and quality based carcass merit in an Angus-based herd. The ROI is reported in dollars per calf produced in the herd, and consolidates the sub-indexes of MPI and QPI.

- ◇ A proven choice for calving ease, nice females, and significant carcass improvement.
- ◇ Used heavily in commercial heifer programs, SURE FIRE's ability to boost value as a service sire has helped pay a lot of bills for our customers.
- ◇ With more than 1500 daughter records and over 260 actual carcass records, no other proven calving ease and high marbling sire comes close.
- ◇ Use SURE FIRE to take advantage of reduced stature too - he's below breed average for MW, MH and YH.

DAM: WOODHILL EVERGREEN Z291-B233  
TEHAMA SIERRA CUT Z118  
WOODHILL EVERGREEN U6-Z291

- ◆ BLUEPRINT is quietly becoming the best son of Confidence Plus to date! His offspring have been turning heads and topping sales with several sons landing at major programs and A.I. studs.
- ◆ He sires the type admired by true cattlemen and is a perfect cross for larger frames and flatter-made females that need more shape and width.
- ◆ BLUEPRINT is as balanced as you can get from a data standpoint and covers a lot of bases without striking out or being extreme. He adds muscle, over +1.00 REA, improves foot quality, all while maintaining moderate CE and solid maternal traits.
- ◆ We get requests regularly for bulls that make the "right kind". Well, here he is! BLUEPRINT will be a must-use sire in 2022!

# 7AN550 HOOVER **KNOW HOW**

\$25

- ◇ KNOW HOW offers the extra muscle, power and punch that many cattlemen are looking for.
- ◇ He is a breed leader for \$C but also excels for important maternal traits like HP, Claw, and Angle. A foot improver, fertility improver, and plenty of end product merit...What a combination!
- ◇ Look for KNOW HOW to sire progeny that are square built, powerfully constructed with added eye appeal and depth.
- ◇ Study KNOW HOW closely. He puts together several very unique traits.

# 7AN388 S S **NIAGARA** Z29

\$25

- ◇ NIAGARA continues to be one of our sales leaders and a high customer-satisfaction sire.
- ◇ As a high accuracy sire, NIAGARA still ranks among the elites for YW, RADG and REA. He also remains a foot improver with almost 500 records!
- ◇ Expect offspring to lead the pack for growth and expect daughters to exhibit the extra power and rib shape that is highly sought after. It's no fluke and NIAGARA is showing up in famous pedigrees across the country.

# More THAN AN A.I. COMPANY

At Select Sires, we are committed to developing market opportunities for our customers to capture increased value for their genetics and management. Our first priority is to maximize the number of pregnancies with superior fertility products, services and genetics, but we don't think our job is done until we help you capture the value you have just created.

We are proud to collaborate with these partners to offer their special marketing channels to you.

We are more than an A.I. company, we are here to help you capture VALUE for your calves.

#deliveringmore

# GeneNet

Select Sires acquired GeneNet, a grid marketing company founded by Dr. Ken Conway in 1998, to further our efforts in assisting beef producers as they capture more value for raising better cattle. GeneNet has a 23-year history of helping customers gain access to grid marketing opportunities for their fed cattle and then returning valuable carcass data on those cattle. Customers can use that data to make genetic, management, and marketing decisions to improve quality and profitability.

## **GENENET PROVIDES THE FOLLOWING OPPORTUNITIES TO SELECT SIRES' CUSTOMERS-OWNERS**

- Value-based marketing
- Carcass data
- Market availability and timely marketing

GeneNet is open to beef producers of all sizes and to all types of high-quality genetics. GeneNet, and its strategies and network, are just one more way that Select Sires continues to lead the way by **DELIVERING MORE** to customers-owners and the beef business at large. Learn more at: [www.GeneNetbeef.com](http://www.GeneNetbeef.com) or contact our GeneNet manager, Sandra Utter, at [sutter@selectsires.com](mailto:sutter@selectsires.com).

# 7SM104 GIBBS 7382E **BROAD RANGE**

**\$25**

- ◇ BROAD RANGE is a calving sire prospect that is outcross to the top registration sires! He is already the number 33 registration sire and moving up!
- ◇ BROAD RANGE has been heavily sampled in both A.I. and ET programs. He's receiving excellent Calving Ease reports and has already produced sale toppers!
- ◇ Check out his balanced EPD profile from a phenomenal donor dam at Gibbs Farms.
- ◇ BROAD RANGE is a purebred 7SM80 WIDE RANGE son offering more CE and MARB than his sire.

From Gibbs Farms, AL; K Diamond Cattle and TNT Simmentals, ND; River Creek Ranch, KS and Trauernicht Simmentals, NE

# 7SM125 CDI **MAJOR IMPACT** 280H

**\$25**

- ◇ We have been on the hunt for a powerful "cow sire" and the search led us to the addition of MAJOR IMPACT.
- ◇ He is a high-ranking growth, elevated performance, and product-oriented sire. MAJOR IMPACT truly excels in maternal numbers, all while remaining sensible in frame size, CE and BW EPD's.
- ◇ MAJOR IMPACT is a LCDR Impact 134F son, the high selling Sugar C4 son that resides at Rydeen Farms in MN. With semen unavailable from his sire, MAJOR IMPACT is a great alternative.

From Hart Simmentals, SD

JBS BIG CASINO 336Y  
MISS SR Y1102

- ◊ In his first full year, HIGHLIFE has become a sales leader at Select Sires. The popular blaze face, coupled with his exciting phenotype and growth potential has not disappointed in his first calf crop.
- ◊ HIGHLIFE has 11 EPDs in the top 10 percent. His API index is top 10 percent and TI index is top 3 percent!
- ◊ He offers big-time growth potential while being backed by an outstanding wedge shaped, young Big Casino daughter who is making her mark with her progeny.
- ◊ HIGHLIFE has outstanding maternal lineage. He is sired by a WS Sugar C4 son, KBHR High Road, a maternal brother to 7SM116 PROGRESSIVE.
- ◊ There is a lot to appreciate here – blaze face, pedigree, phenotype, EPD package! Don't just sample HIGHLIFE. Use him heavily!

# 7SM91 TJ MAIN EVENT 503B

\$25

- ◆ MAIN EVENT continues to satisfy customers by consistently siring offspring that rise to the top for performance with stunning phenotype.
- ◆ He is currently the No. 4 registration sire of the breed.
- ◆ MAIN EVENT ranks in the top 10 percent or better, with an extreme amount of accuracy for WW, YW, MILK, MWW, CW and REA.
- ◆ Expect MAIN EVENT to sire explosive growth without excessive frame. His male offspring will have plenty of red meat and end product while his daughters will raise heavy calves that excel at weaning!

# 7SM121 SAS **COPPERHEAD** G354

\$30

- ◊ COPPERHEAD was a new addition to our red lineup in 2021 and has been one of the most talked about sires.
- ◊ COPPERHEAD offers a unique outcross red pedigree that cattlemen have been begging for without sacrificing the rest.
- ◊ For those of you that follow on social media, you have already seen the outstanding progeny at High Country Cattle Service. They have created quite the buzz throughout the summer and fall. The COPPERHEAD calves look to have plenty of volume, eye appeal and structural integrity. Most recently, he sired the Champion Get of Sire at Farmfair!
- ◊ COPPERHEAD has a small, white stipe in the center of his head — hence the name, COPPERHEAD. Yet he has the ability to sire blaze-face calves out of solid-faced cows, which are in high demand today!

- ◊ A long term, mainstay of the Select Sires lineup. He is the No. 18 sire of the breed for registrations. He is getting his second wind and for good reasons - his daughters!
- ◊ DIVIDEND daughters are quiet, have near-perfect feet, beautiful teats and udders, are deep-bodied and beautifully structured.
- ◊ DIVIDEND is a customer satisfaction sire! The comment of those who have females in production is, "I will go back and use more!"

# 7 & 7 SYNCH

AN OPPORTUNITY TO IMPROVE A.I. SUCCESS RATES IN BEEF COWS

Rising operating costs, global competition, and societal concerns about energy and the environment have created many economic challenges for the beef industry. In order for beef producers to meet increasing demand for high quality beef products, they must heighten their focus on increasing the efficiency of beef production. This can be achieved through implementation of specific best management practices, and with the adoption of technologies to improve the efficiency in their herds. Many beef producers across the U.S. continue to look for opportunities to reduce time and labor associated with A.I. while maintaining or improving the resulting A.I. pregnancy rates. That vision has become a reality with the development of fixed-time A.I. (FTAI) protocols for beef heifers and cows. These protocols were developed through intensive research programs, and they were proven to be effective in the field prior to being recommended to beef producers across the U.S. One of the newer additions to the list of protocols recommended for use in beef cows is the 7 & 7 Synch program (Figure 1 above), originally developed and field tested by Dr. Jordan Thomas and his colleagues at the University of Missouri.

The 7&7 Synch program has been evaluated in a data-intensive pilot project, an extensive field trial for synchronization among

embryo recipients, and an extensive field trial evaluating 7 & 7 Synch with fixed-timed A.I. using both conventional and sex-sorted semen. Results indicate a significant increase in the proportion of cows expressing estrus following synchronization and the A.I. pregnancy rates achieved (Table 1 and 2 below). Select Sires representatives are currently using the 7 & 7 Synch program in herds where the producers want to optimize the success of estrus synchronization programs and A.I. pregnancies. Numerous reports from herds utilizing this program with heat detection and A.I. and FTAI have indicated an increase in A.I. success, thus allowing more cows to be bred A.I. in the first few days of the breeding season, and resulting in more calves on the ground in a shorter time frame during calving season. We all know more calves born early in the calving season means more pounds at weaning and potential for more profit in your pockets. Not only are you getting more pounds weaned; the older, heavier A.I. sired heifer calves have a higher potential to conceive early as a heifer and remain in the herd longer than later born calves. **Visit with your Select Sires representative today to discuss how we can better serve you to achieve your maximum A.I. and reproductive success!**

**Table 1. Estrus Expression Prior to Fixed-Time A.I.**

Treatment	Proportion	%
7 & 7 Synch	630/769	82 <sup>a</sup>
7-day CO-Synch + CIDR	492/769	64 <sup>b</sup>

<sup>ab</sup>A greater proportion ( $P < 0.01$ ) of cows expressed estrus prior to fixed-time A.I. following 7 & 7 Synch

Source: Andersen et al., 2020.

**Table 2. Pregnancy Rates to Fixed-Time A.I.**

Treatment	Conventional Semen		Sex-Sorted Semen	
	Proportion	%	Proportion	%
7 & 7 Synch	280/389	72 <sup>a</sup>	199/380	52 <sup>c</sup>
7-day CO-Synch + CIDR	233/383	61 <sup>b</sup>	170/386	44 <sup>d</sup>

<sup>ab,cd</sup>Pregnancy rates were greater ( $P < 0.01$ ) among cows following 7 & 7 Synch with conventional or sex-sorted semen

Source: Andersen et al., 2020.

# A.I. DRIVES PROFITABILITY

## WHAT ARE THE REPRODUCTIVE DRIVERS OF PROFITABILITY IN BEEF HERDS?

1. **Number of calves weaned over lifetime:** How many years does she conceive, calve and wean a calf before being culled? Over how many years can the cost of developing the cow be depreciated?
2. **Age and weight of calves weaned:** Does she conceive early in the breeding season as a heifer and continue to calve early as a cow? Early calving cows will wean older and heavier calves.
3. **Quality of calves weaned:** How much value do her calves capture based on health, growth, performance, carcass merit, visual appearance, etc.?

ESTRUS SYNCHRONIZATION AND TIMED A.I. CAN IMPROVE YOUR HERD IN EVERY ONE OF THESE AREAS!

## PROVEN DRIVERS OF PROFITABILITY:

- Heifers who calved during the first 21-day period with their first calf remained in the herd longer than heifers who calved later. Early calving heifers also wean a heavier calf in each of their first six calving seasons. (Cushman et al., 2013)
- Early born A.I. heifer calves as potential replacements have:
  - o Greater weaning and pre-breeding weights
  - o Greater number of heifers cycling prior to breeding season
  - o Greater pregnancy rates in first breeding season
  - o Potential improvements in breed back as two year olds
- Early born A.I. steer calves have:
  - o Greater weaning weights
  - o Greater percentage choice or better
  - o Greater carcass value (better carcass weight and marbling score)

(Larson and Funston, 2009; Funston et al., 2011)

## TIPS FOR USE OF *gender SELECTED™* (SEXED) SEMEN:

- Thaw semen in a clean and regulated warm water bath (95°-98°F) for 45 seconds.
- Pay close attention when handling thawed straws of sexed semen to ensure you maintain 95°-98°F temperature until the semen can be deposited in the female.
- Thawed sexed semen should be deposited in the female within five minutes.
- It is strongly encouraged to apply estrus detection aids to help monitor heat activity and only use sexed semen in those females that display estrus.
- Sexed semen may remain fertile for a shorter period of time in the female following A.I. Therefore, A.I. should be performed approximately 18-22 hours after the start of standing heat behavior.<sup>1</sup> This is slightly later than the time recommended when using conventional (non-sexed) semen.
- Manage expectations: The use of sexed semen could result in conception rates below that of conventional semen. A recent meta-analysis in Nature<sup>2</sup> indicated that frozen-thawed sexed semen achieves 83 percent of conventional semen pregnancy rates (i.e. if you typically achieve 55 percent with conventional semen, you may achieve 46 percent with sexed semen).

<sup>1</sup>Thomas et al. 2014. Delayed insemination of nonestrous cows improves pregnancy rates when using sex-sorted semen in timed artificial insemination of suckled beef cows. Journal of Animal Science. Vol 92, Issue 4: 1747-1752.

- ◇ FRANCHISE's value in the 9 Mile and Pieper Red Angus programs is notable in emerging young females in both operations. His sons rank as one of the top sire groups for calving ease and phenotype selected by satisfied customers.
- ◇ He provides a red/black option with a focus on balance, along with one of the most prominent performance cow lines in the business, the Abigrace family.
- ◇ His progeny proof displays super figures for CED and low BW, and his projections for HPG, CEM and carcass merit rank him high for ProS and Gridmaster
- ◇ His phenotype continues to draw attention in Red Angus and SimAngus™ programs. He is mainstay for calving ease and phenotype.

- ◇ Phenotype, performance, and carcass merit in one complete package.
- ◇ Power sire loaded with muscle, depth of rib, and length of body in a 6.2 frame score.
- ◇ Ranks near the top of breed for REA, Marbling, Carcass Weight, GridMaster, and ProS.
- ◇ His dam 605D, is a rising star in the Hueftle herd with a 107 MPPA and excellent udder quality and feet.
- ◇ Posted individual growth ratios of 115 WW, 115 YW, and 115 ADG.
- ◇ Early calf reports look very good, as calves exhibit added muscle and base width.

From Hueftle Cattle Company, NE

“ At Hueftle Cattle Company, we focus on producing cutting-edge, outcross genetics like GRINDSTONE. In the Red Angus breed, his EPD profile has 7 traits in the top 5 percent or higher. He scores in the top 10 percent in the new ProS index, which measures profitability & sustainability. His Dam, 605D is a rising star in the HXC herd, with a 107 MPPA. The Allegiance X Spur Garton combination is proving to be highly successful in our breeding program.

- ◊ TOP GUN's classification as a go to calving ease and carcass option allows him merit with an outcross mating to most of the current young sires emerging in the breed.
- ◊ This sire's proof in the 5L, Croissant and Solid Rock Red Angus programs is driving his accuracy as a strong option to sire young seed stock excelling in ProS, Gridmaster, and a suite of convenience traits like CED, BW, ME, HPG, and CEM.
- ◊ TOPGUN's progeny draws attention from visitors and at sales across the country.
- ◊ Overall customer satisfaction for use on heifers in purebred and commercial operations is notable and their potential to finish with premiums for Gridmaster allows him to land on your short list.

## BOVINE ACCELLYTE II

Maintaining health is vital to being profitable. BOVINE ACCELLYTE II is a specialized electrolyte for periods of stress, rehydration and pre-hydration during events such as:

- Extreme temperatures
- Calving
- Vaccinations
- Illness
- Feed Changes
- Shipping and Receiving

BOVINE ACCELLYTE II contains electrolytes to replace those lost during periods of stress, energy to provide an added boost and minerals and vitamins to compensate for deficiencies from reduced intakes. In addition to on-farm events, it's an ideal option to hydrate show stock.

# TRI-START JR+

Performance Proven +  
Latest Research + Easy Application

Getting a calf off to a strong start is critical. To help support the pre-weaned calf, look to Tri-Start Jr+ (paste form). Developed using the latest calf research and technology, the unique formula of Tri-Start Jr+ is designed to help protect calves against pathogens, while also enhancing gut health and boosting digestive and immune system development. Tri-Start Jr+ is perfect for jumpstarting a newborn calf or anytime a pre-weaned calf experiences health, environmental or management challenges. Available in single-dose and multi-dose applicators.

# FIRST DAY FORMULA®

Simple. Safe. Scientifically Proven.

The latest research suggests that producers need to raise the bar on successful passive transfer.

- Made with 100 percent dried bovine colostrum to optimize immune development and health
- Provides consistency with the research-based amount of IgGs for every calf
- Assures biosecurity from transmittable diseases
- Offers convenience whenever timing is a factor

- ◇ Now a trait leader for a whopping 16 traits, CUDA is a rare sire who can offer improvement in just about every category.
- ◇ Combines Calving Ease, growth, maternal goodness and Carcass Merit as well as any – and he's proven.
- ◇ One of the most heavily used sires in the breed over the past year, CUDA's ability to make both great daughters and sons will help to maintain his wide-spread use.

# 14HP1037 KT **SMALL TOWN KID** 5051

**\$20**

- ◇ Great combination of Calving Ease, phenotype and performance.
- ◇ He is best described as moderated framed, square made, soft bodied, with good feet and sound structure.
- ◇ In addition to phenotype, he offers a very balanced trait EPD profile, ranking in the top 10 percent of breed for 10 different traits, including Calving Ease and multiple Maternal traits.
- ◇ Ranks in the top 5 percent of breed for both CED and BW, and top 1 percent of breed for Udder Suspension and Teat Size.
- ◇ A perfect sire for those who want a Hereford bull with great phenotype and Calving Ease in the same package. He has over 900 progeny in his record with a 98 ratio for BW.
- ◇ He stacks a pedigree of breed greats with Hometown, Time's A Wastin, and Prospector.
- ◇ SMALL TOWN KID has been identified as a carrier of Mandibulofacial Dysostosis (MD).

HETERO. POLLED

\$20

- ◇ LEAD TIME is moderately framed, bold-ribbed and deep-sided.
- ◇ His combination of CE with added phenotype have contributed to his rising popularity.
- ◇ LEAD TIME is a double-digit CE sire that ranks among the top of the breed for BW.
- ◇ Expect his progeny to boast an increase in Marbling and breeding sons to rank among the top of their contemporaries for Scrotal Circumference.

# SUPPLEMENTAL INFORMATION

## To order Select Sires or Accelerated Genetics beef semen:

1. Contact your local Select Sires representative. To find a representative in your area, see the inside back cover of this directory.
2. Order online at [www.selectsiresbeef.com](http://www.selectsiresbeef.com) or [www.agbeef.com](http://www.agbeef.com).

## To order A.I. certificates:

Visit [www.selectsiresbeef.com](http://www.selectsiresbeef.com), [www.accelgen.com](http://www.accelgen.com) or call our customer service line at 1-800-251-3049 to order A.I. Certificates.

## Photo Requests:

To request a sire photo to be e-mailed to you or to submit progeny photos, contact Jennie Harbin at [jharbin@selectsires.com](mailto:jharbin@selectsires.com) or (402) 317-1198.

# EXPECTED PROGENY DIFFERENCES TERMINOLOGY

**Expected Progeny Difference (EPD)** - The expected difference in performance of a sire's progeny compared to the performance of another sire's progeny.

**Accuracy (Acc.)** - a measure of reliability of an EPD expressed between 0 and 1.0. Accuracies closer to 1.0 means the EPD is a more reliable estimate of a sire's true genetic value for the trait.

**% Rank** - Based on percentages, this indicates where a sire's EPD ranks him in the entire population of his respective breed.

**Calving Ease Direct (CED)** - is the difference in percentage of unassisted births when a sire is bred to first-calf heifers. A higher number is desirable.

**Birth Weight (BW)** - predicts the difference in average birth weight of a sire's calves compared to calves of another sire. Reported in pounds, a lower number is desirable.

**Weaning Weight (WW)** - predicts the difference in average 205-day weight of a sire's progeny compared to calves of another sire. Reported in pounds, a higher number is desirable.

**Yearling Weight (YW)** - predicts the difference in average 365-day weight of a sire's progeny compared to progeny of another sire. Reported in pounds, a higher number is generally desirable.

**Yearling Height (YH)** - The YH EPD predicts the difference in yearling hip height of a sire's progeny compared to progeny of another sire. Reported in inches, ideal values vary depending on production environment.

**Residual Average Daily Gain (RADG)** - expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

**Dry Matter Intake (DMI)** - expressed in pounds per day, is a predictor of difference transmitting ability for feed intake during the postweaning phase, compared to that of other sires.

**Scrotal Circumference (SC)** - The SC EPD predicts the difference in yearling scrotal circumference of a sire's male progeny compared to progeny of another sire. Reported in centimeters, a larger number is desirable.

**Docility (Doc)** - is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

**Calving Ease Maternal (CEM or MCE)** - is expressed as a difference in percentage of unassisted births of a sire's daughters as first-calf heifers when compared to daughters of other sires. Reported as a percentage, a higher value is desirable.

**Milk (MILK)** - The Milk EPD predicts the difference in average 205-day weight of a sire's daughters' calves compared to the calves from daughters of another sire. Reported in pounds, ideal Milk values depend heavily upon the nutritional environment of the herd.

**Maternal Weaning Weight (MWW -Simmental);**

**Milk and Growth (M&G - Hereford); Total**

**Maternal (TM - Red Angus)** - The EPD predicts the Weaning Weight of a sire's daughters' progeny

and reflects both the milking ability of a sire's daughters and the growth potential of their calves. Reported in pounds, higher numbers are generally desirable.

**Stayability (STAY - Red Angus & Simmental)** - The stayability EPD predicts the probability of a sire's daughters staying in production to at least six years of age compared to daughters of another sire. Reported as a percentage, a higher value is desirable.

**Carcass Weight (CW)** - The EPD predicts the difference in hot carcass weight of a sire's progeny compared to progeny of all other sires evaluated at a given endpoint. Reported in pounds, a higher number is generally desirable.

**Marbling (MARB, IMF)** - The EPD predicts the difference in average USDA Marbling score of a sire's progeny compared to progeny of another sire at a similar end point. Reported in degrees of a Marbling score, higher values are desirable.

**Ribeye Area (REA)** - The EPD predicts the difference in ribeye area of a sire's progeny compared to the progeny of another sire and is an indicator of total muscle in the carcass. Reported in square inches, larger numbers are generally desirable.

**Fat (FAT)** - The EPD predicts the difference in fat thickness of carcasses, measured between the twelfth and thirteenth ribs, of a sire's progeny compared to progeny of another sire. Reported in inches, lower values are desirable.

**Yield Grade (YG - Simmental)** - The EPD predicts differences in USDA Yield Grade of a sire's progeny compared to progeny of another sire. Reported in tenths of a USDA YG, lower numbers are desirable.

## ANGUS:

**Cow Energy Value (\$EN)** - expressed in dollars saved per cow per year, the EPD assesses differences in cow energy requirements for daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). \$EN savings differences account for lactation energy requirements and mature size of cows.

**Maternal Weaned Calf Value (\$M)** - an index, expressed in dollars per head, predicts profitability differences from conception to weaning. The model assumes commercial producers will replace 25 percent of their breeding females in the first generation and 20 percent of their breeding females in each subsequent generation. Traits included are as follows: Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Heifer Pregnancy, Docility, Mature Cow Weight, Claw Set and Foot Angle.

**Weaned Calf Value (\$W)** - an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in Birth Weight, Weaning Direct Growth, Maternal Milk and Mature Cow Size.

**Feedlot Value (\$F)** - an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

**Grid Value (\$G)** - an index value expressed in dollars

per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Beef Value (\$B)** - an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

**Combined Value (\$C)** - an index value expressed in dollars per head, that blends both maternal and terminal indexes using information and relationships from 14 different traits.

## SIMMENTAL:

**All-Purpose Index (API)** - expressed in net dollars returned per cow exposed, evaluates Simmental sires being used on the entire cowherd (bred to both Angus first-calf heifers and mature cows) with a portion of the daughters retained for breeding and the steers and remaining heifers fed and sold on a carcass grade and yield basis. With the exception of shear force (tenderness), all EPDs are considered in this index.

**Terminal Index (TI)** - expressed in net dollars returned per cow exposed, evaluates the merit of sires when bred to mature Angus cows and all progeny are fed and sold on a carcass grade and yield basis. Consequently, maternal traits such as milk, stayability and MCE are not considered in this index.

**SimAngus** - SimAngus™ is a trademark of the American Simmental Association.

## RED ANGUS:

**HerdBuilder Index (HB)** - As the name indicates, implementation of the HerdBuilder index will assist producers in building profitable herds. The HerdBuilder index is built using the following production scenario: Red Angus sires mated to cows and heifers (resulting progeny ¾ Red Angus, ¼ Simmental), replacement heifers retained from within the herd, and all remaining progeny sold on a quality based carcass grid.

**GridMaster Index (GM)** - While Red Angus has traditionally been known as a superior maternal breed, those who have retained ownership in Red Angus calves know of their potential to excel in the feedyard and ultimately hang a premium carcass. The GridMaster index is built using the following production scenario: Red Angus sires mated to cows (resulting progeny ¾ Red Angus, ¼ Simmental) and all progeny sold on a quality-based carcass grid.

## HEREFORD:

**Baldy Maternal Index (BMI\$)** - This is an index to maximize profit for commercial cow-calf producers who use Hereford sires in rotational crossbreeding programs on Angus-based cows. Retained ownership of calves through the feedlot phase of production is maintained and the cattle are to be marketed on a Certified Hereford Beef pricing grid.

**Certified Hereford Beef Index (CHB\$)** - This is a terminal sire index, where Hereford sires are used on British-cross cows and all offspring are sold as fed cattle on a CHB pricing grid. There is no emphasis on milk or fertility since all cattle will be terminal. This index promotes growth and carcass.

# 2022 Beef Heifer A.I. Protocols

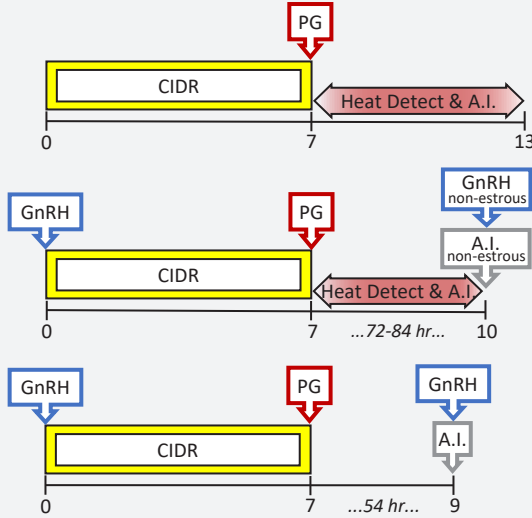

## 1-Shot PG

### Heat Detection

Heat detect and A.I. based on AM-PM rule from day 0 to 12

## 7-Day

### Heat Detection

Heat detect and A.I. based on AM-PM rule from day 7 to 13

### Heat Detection + Timed A.I.

Heat detect & A.I. based on AM-PM rule day 7 to 10; A.I. non-estrous heifers 72 - 84 hr after CIDR removal, with GnRH at A.I.

### Fixed-Time A.I.

A.I. all heifers at 54 ± 2 hr after CIDR removal, with GnRH at A.I.

## 5-Day

### Fixed-Time A.I.

A.I. all heifers at 60 ± 4 hr after CIDR removal, with GnRH at A.I.

**PG** estroPLAN, Estrumate, In-Synch, Lutalyse, Lutalyse *HighCon*, ProstaMate, SYNCHSURE

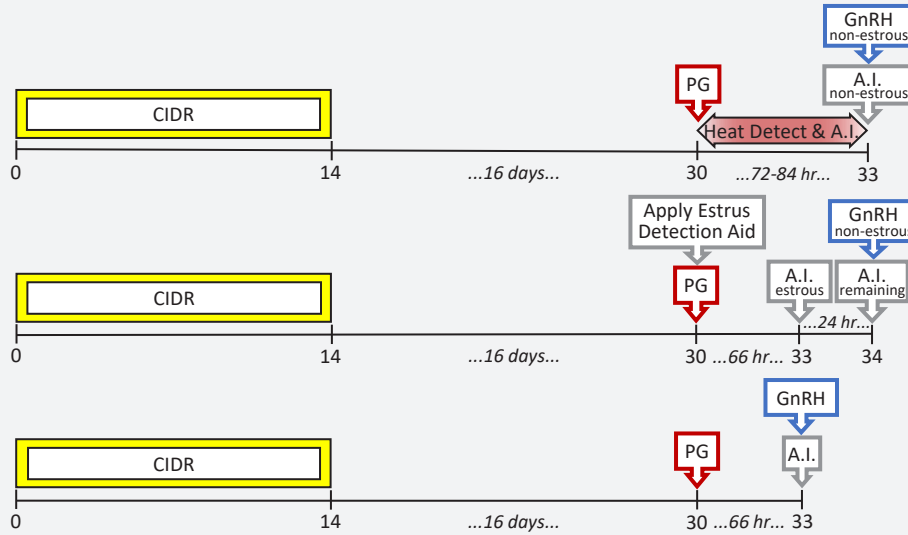

**GnRH** Cystorelin, Factrel, Fertagyl, GONABreed, OvaCyst

**CIDR** Intravaginal progesterone Controlled Internal Drug Release

**MGA** Melengestrol acetate feed additive: MGA, HeifermaX

Pharmaceutical products used for estrus synchronization should be administered at the label dose. Consult product packaging. Label-approved applications vary from product to product, and pharmaceutical products for synchronization should be used in the context of an ongoing veterinarian-client-patient relationship.

## 14-Day CIDR-PG

### Heat Detection + Timed A.I.

Heat detect & A.I. based on AM-PM rule day 30 to 33; A.I. non-estrous heifers at 70 - 84 hr after PG, with GnRH at A.I.

### Split-Time A.I.

A.I. estrous heifers at 66 ± 2 hr after PG; A.I. remaining heifers 24 hr later, with GnRH at A.I. for non-estrous heifers

### Fixed-Time A.I.

A.I. all heifers at 66 ± 2 hr after PG, with GnRH at A.I.

## MGA-PG

### Heat Detection + Timed A.I.

Heat detect and A.I. based on AM-PM rule from day 33 to 36; A.I. non-estrous heifers at 72 - 84 hr after PG, with GnRH at A.I.

### Split-Time A.I.

A.I. estrous heifers at 72 ± 2 hr after PG; A.I. remaining heifers 24 hr later, with GnRH at A.I. for non-estrous heifers

### Fixed-Time A.I.

A.I. all heifers at 72 ± 2 hr after PG, with GnRH at A.I.

# 2022 Beef Cow A.I. Protocols

**PG** estroPLAN, Estrumate, In-Synch, Lutalyse, Lutalyse *HighCon*, ProstaMate, SYNCHSURE

**GnRH** Cystorelin, Factrel, Fertagyl, GONABreed, OvaCyst

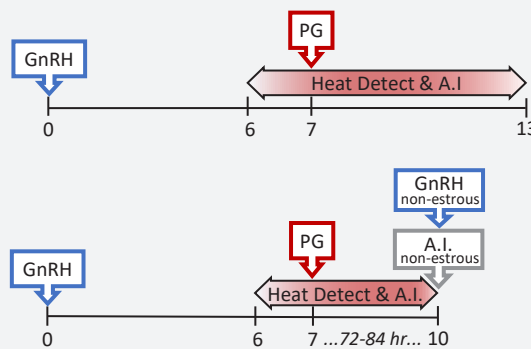

**CIDR** Intravaginal progesterone Controlled Internal Drug Release

Pharmaceutical products used for estrus synchronization should be administered at the label dose. Consult product packaging. Label-approved applications vary from product to product, and pharmaceutical products for synchronization should be used in the context of an ongoing veterinarian-client-patient relationship.

For more information on proper handling and administration of synchronization products, see University of Missouri Extension publication G2022, *Guide to Estrus Synchronization Products*.

Protocol recommendations are based on peer-reviewed research in the field of hormonal control of the bovine estrous cycle. This is not an exhaustive list of all possible protocols but provides commonly-used and effective options.

## Select Synch

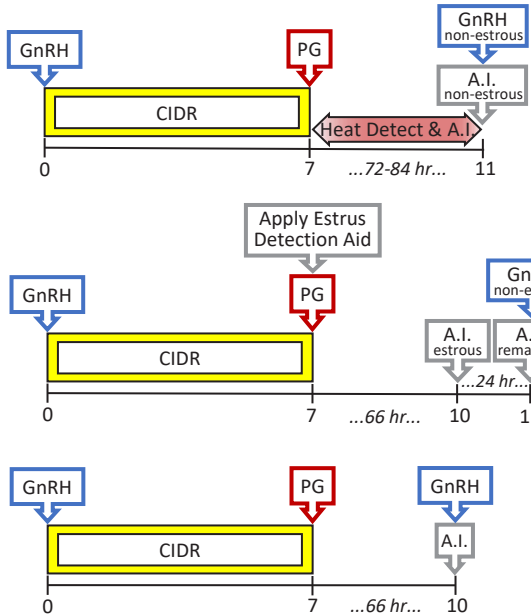

### Heat Detection

Heat detect and A.I. based on AM-PM rule from day 6 to 13

## Bos indicus PG 5-Day CIDR

### Fixed-Time A.I.

A.I. all cows at 66 ± 2 hr after CIDR removal, with GnRH at A.I.

## A.I. Technique in Cattle

Mel DeJarnette, Vice President Semen Processing and Research and  
Dr. Ray Nebel, Vice President of Technical Service Programs, Select Sires Inc.

The recto-vaginal technique is the most commonly used method to artificially inseminate cattle. The basic skills required to perform this technique can be obtained with about three days practice under professional instruction and supervision. Additional proficiency and confidence will be achieved with further work on your own.

Regardless of whether you are left or right handed, it is recommended that you use your left hand in the rectum to manipulate the reproductive tract and the right hand to manipulate the insemination gun. This is because the rumen or stomach of the cow lies on the left side of the abdominal cavity, displacing the reproductive tract slightly to the right. Thus, you will find it much easier to locate and manipulate the tract with your left as opposed to right hand.

Raise the tail with your right hand and gently massage the rectum with the lubricated glove on your left hand. Place the tail on the left side of your left forearm so it will not interfere with the insemination process. With your fingers together in a pointed fashion, insert your hand in the rectum, up to your wrist.

Gently wipe the vulva with a paper towel to remove excess manure and debris. Be careful not to apply excessive pressure, which may smear or push manure into the vulva and vagina. With your left hand make a fist and press down directly on top of the vulva. This will spread the vulva lips allowing clear access to insert the gun tip several inches into the vagina before contacting the vaginal walls. **Insert the gun at a 30° upward angle to avoid entering the urethral opening and bladder located on the floor of the vagina.** With the gun about six to eight inches inside the vagina, raise the rear of the gun to a somewhat level position and slide it forward until it contacts the external portion of the cervix. **You will note a distinct gristly sensation on the gun when it contacts the end of the cervix.**

The cervix, consists of dense connective tissue and muscle and is your primary landmark for inseminating cattle. It has often been described as having the size and consistency of a turkey neck. The size will vary, with post partum interval and age of the animal. The cervix usually has three or four annular rings or folds. **The opening into the cervix protrudes back into the vagina.** This forms a 360° blind-ended pocket completely around the cervical opening. This pocket is referred to as the fornix. In most cows, the cervix will be located on the floor of the pelvic cavity near the anterior end of the pelvic bone. In older cows with large reproductive tracts, the cervix may rest slightly over the pelvic bone and down into the abdominal cavity.

To become a successful inseminator it is very important that you **always know where the tip of the insemination gun is located.** The walls of the vagina consist of thin-layered muscle and loose connective tissue. The insemination gun can be easily felt with your palpating hand. As you insert the breeding gun into the vagina, keep your gloved hand even with the gun tip.

Manure in the rectum can often interfere with your ability to palpate the cervix and gun tip. However, it is seldom necessary to remove all the manure from the bowel. Instead, keep your open hand flat against the floor of the rectum, allowing the manure to pass over the top of your hand and arm.

While handling the cervix you may notice rectal constriction rings attempting to force your arm from the cow. To relax these rings, place two fingers through the center of a ring and massage back and forth. The constriction ring will eventually relax, pass over your hand and arm, and you can continue the palpation process.

Because the reproductive tract is freely movable, cows that have strong rectal and abdominal contractions in response to being palpated may actually push their reproductive tract back into the pelvic cavity. This will cause many folds to form in the vagina. In such cases, the insemination gun will often get caught in these folds and little or no progress will be made until they are removed. If you can locate the cervix, grasp it and push it forward. This will straighten the vagina and the gun should pass freely up to the cervix. If you cannot locate the cervix, encircle the gun tip with your thumb and forefingers. With a straightening motion of your wrist, gently “milk” the folds out of the vagina a little at a time. Slide the gun forward and repeat the process until the cervix is reached.

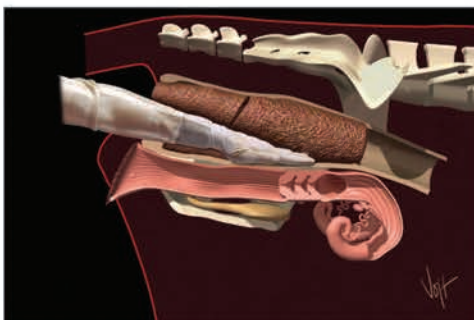

Because the rumen displaces the reproductive tract to the right, it is much easier to locate and manipulate the tract with your left hand.

The cervix is located on the floor of the pelvic cavity near the anterior end of the pelvic bone.

As you insert the breeding gun into the vagina, keep your gloved hand even with the gun tip.

Keep your open hand flat against the floor of the rectum, allowing manure to pass over the top of your hand and arm.

Grasp the external opening to the cervix with the thumb on top and the forefingers underneath to close the fornix and guide the gun tip into the cervix.

Using the flexibility of your wrist, twist and bend the cervix until you feel the second ring slide over the gun tip.

Use your index finger to check gun placement (1/4 inch past the end of the cervix) before depositing semen.

At this point it is important for you to understand that inseminating a cow is a two-step process. **The first step is to get the gun tip to the cervix. To accomplish this you must work the vagina and cervix forward, away from you to straighten the vaginal folds.** If you do not feel the gristly sensation of the cervix on the gun, you are still in step one of the process.

Once the gun is in contact with the external surface of the cervix you are ready to begin step 2. **In step 2, you place the cervix on or over the insemination gun.** That's right, the cervix is placed on the gun, the gun is not passed through the cervix. Excessive movement or probing with the insemination gun during the second step is very often counterproductive. Ground gained is often lost and we find ourselves back in a vaginal fold. **The key to mastering step 2 of the insemination process is to know how to hold and manipulate the cervix and concentrating on doing the work with the hand inside the cow, not the one holding the gun.**

When the gun first contacts the cervix, you will usually find that the tip is in the fornix directly over top of the opening. **Grasp the external opening to the cervix with the thumb on top and forefingers underneath.** This closes the fornix at top and bottom. As in step 1 we must still know the location of the gun tip. This is accomplished with the palm and third and fourth fingers of your palpating hand. **Use your palm and these two fingers to guide the gun tip to the cervical opening located between your thumb and forefingers.**

With gentle probing the opening should be located. You will feel the gun slide forward until it contacts the second cervical ring. **Maintain gentle but steady forward pressure on the gun and slide your thumb and forefingers just in front of the gun tip and re-grasp the cervix.** Because the cervix is composed of dense connective tissue and muscle, it is difficult to clearly distinguish the gun tip when it is located within this structure. However, you can determine the approximate location by bending the cervix. **Using the flexibility of your wrist, twist and bend the cervix until you feel the second ring slide over the gun tip.** Repeat the process until all the rings have been passed over the gun tip. In some cases, it may be necessary to bend the cervix at a 90° angle to clear the cervical folds. Remember, you are placing the cervix over the gun, not the gun through the cervix.

A slight jiggle or "give-and-go" of the gun may sometimes be necessary to help pass by a fold, but for the most part gentle forward pressure is all that is necessary and gun movement should be minimal.

When all rings of the cervix have been cleared, the gun should slide forward freely with little resistance. Since the uterine wall is very thin, you will once again be able to clearly feel the insemination gun. You are now ready to check your placement and deposit the semen. Rotate your gloved hand until it lies on top of the cervix. With your index finger, locate the far end of the cervix. **Pull back on the gun until you feel the tip directly underneath your finger near the internal opening of the cervix. Raise your finger and slowly deposit the semen. Push the plunger slowly so that drops of semen fall directly into the uterine body.**

With proper A.I. technique and gun placement, semen will be deposited in the uterine body. Uterine contractions will then transport spermatozoa forward to the horns and oviducts with a good distribution of both sides. **When the insemination gun is more than 1 inch through the cervix, all the semen will be deposited in only one horn.** This creates a situation of uneven semen distribution. Should the animal ovulate from the opposite horn, conception rates may be compromised.

**Be sure to raise your finger after checking gun placement.** Not doing so may obstruct one horn, again creating a situation of uneven semen distribution. When checking gun tip placement, be careful not to apply excessive pressure. The delicate uterine lining is easily damaged, predisposing the cow to uterine infections and reduced fertility.

**Make sure you push in with the plunger and do not pull back on the gun.** Pulling back may result in much of the semen dose being deposited in the cervix and vagina instead of the uterine body.

Although the recommended site of semen deposition is in the uterine body, research suggests that when exact gun tip placement is in doubt, depositing semen slightly into one uterine horn is less likely to compromise fertility than cervical deposition.

After properly depositing semen, slowly pull the gun from the reproductive tract. Remove the gloved hand from the rectum and shake off the excess manure. Check the gun tip for signs of blood, infection or semen leakage inside the sheath. Make notes for your veterinarian or future reference where appropriate. Remove the sheath from the gun and hold it in the gloved hand. For the final time, check to confirm which bull you have used. Remove the glove starting at the top of your arm by turning it inside out as you remove it. Wipe the gun clean and dry and return it to the proper storage location.

Some of the most important aspects to remember when inseminating a cow to attain maximum breeding efficiency are:

- Be gentle. Don't use too much force.
- Insemination is a two-step process. Get the gun to the cervix, and then place the cervix over the gun.
- Deposit the semen just through the cervix into the uterine body.

Correct insemination procedures will result in better breeding efficiencies. More selection pressure can then be placed on economic traits enabling you and your family to realize a higher return on your semen investment dollars. For more information about A.I. training classes, contact your Select Sires representative.

*Some of the most important aspects to remember when inseminating a cow to attain maximum breeding efficiency are:*

- *Be gentle. Don't use too much force.*
- *Insemination is a two-step process. Get the gun to the cervix, and then place the cervix over the gun.*
- *Deposit the semen just through the cervix into the uterine body.*

Push the plunger slowly so that drops of semen fall directly into the uterine body.

With proper A.I. technique and gun placement, semen will be deposited in the uterine body and contractions will transport spermatozoa forward to the horns and oviducts.

If the gun is more than 1 inch through the cervix, all the semen will be deposited into only one horn.

Make sure you push in with the plunger and do not pull back on the gun. Pulling back may result in much of the semen dose being deposited in the cervix and vagina.
